THE BLURB

is published monthly by and for the members of The PHIL-MONT MOBILE RADIO CLUB, INC. Our purpose is to promote Amateur Radio in general, and Mobile Radio in particular. Copying and quoting is permitted with a credit line. We gladly exchange publications with other amateur radio clubs; requests should be sent to the Editor. BLURB subscriptions are available to non-members for \$6.50 addressed to the Treasurer. The club meets at 8 PM on the first non-holiday Monday of every month at The Franklin Institute, 21st Street and The Benjamin Franklin Parkway, Philadelphia. Use the rear entrance. ALL VISITORS ARE WELCOME!

Amateur Radio License Examinations - Every meeting night at 6:30 PM.

Local Interference Committee Registration Form

I am interested in becoming a member of an EPA/SNJ Local Interference Committee to help resolve problems of Amateur Radio Interference.

I cannot serve on a EPA/SNJ Local Interference Committee, but would like to assist such a group if requested.

I have the following Direction Finding ("DF"), Recording, or other capabilities:

Equipment

(1) Type (e.g. Doppler): _____

(2) Frequencies: _____

(3) Fixed/Mobile/Portable: _____

(4) Availability (Days/Times): _____

Name: _____ Call: _____

Address: _____

Phone: Day: _____ Eve: _____ Lic. Class: _____

Please Return To:

Delaware Valley Council of Amateur Radio Clubs
645 Artwood Drive
Philadelphia, PA 19115
(215) 464-2665

DELAWARE VALLEY COUNCIL

the open INTERFERENCE MEETING

Edith Rosner, W3AAU

There were about 18 Delaware Valley clubs that sat down for some answers from the "powers that be" on 14 December 1987 at the Aviation Supply Office. The powers were represented by

- James Sheehan, Chief, Civil Division, U.S. Attorney's Office, Phila
- Ennis Coleman, K3EL, Engineer in Charge, Third District F.C.C. Field Operations (Langhorne)
- Philip Stein, K2RCG, an Official Observer appointee, Southern New Jersey section, ARRL (He did not officially represent the ARRL.)

The bottom line is that if we, the Ham Community, can't or won't help ourselves no one else will help us. The way things are, the OO has no legal authority. His job is to tell you when you goof. You can get a love note in the mail that your signal stinks and please please do something about it. The laws have no money, no staff and too many more important priorities. So we're on our own!

The only way, it seems, to get their attention and eventual action is to form an active local interference committee. Since such a committee necessarily covers a wide area, it is beyond the scope of any single club. This is where the Council can be important as the coordinating organization. So the Council wants some interested hams to sign up. You are needed.

The job is not easy. Once the violator has been identified and positive proof is obtained individual letters and petitions will be needed to be directed to the authorities - and, please note, volume will be required.

If you are willing to pitch in please call W3AAU, 215/464-2665 our your club's Delegate [K3TX, 946-1040] and a sign-up form will be sent you.

Jay, WA3IFY did a video of the event until his shoulder gave out; it is available on loan to clubs, and there is an audio tape (90 minutes) available, \$5 each payable to the Council.

Continued from page 5

W3888 reported that work has gotten started on the installation of a patch on our repeater...more to follow.

N3DHI reported that MO-COM is bedded down for the winter.

KA3BET commented that we received our renewal form for W5YI News Letter. After some discussion it was decided that we would not renew at this time.

KA3BET started coordinating the 1988 Mid Month Schedule.

The meeting was adjourned at 9:25 PM.

Thanks to Mildred and Charlie for their hospitality and great food!!!! (Especially the pumpkin pie...how to win the heart of the President Elect!)

Respectfully Submitted,
N3EAY, Secretary.

Technical Articles are always welcome in the BLURB!

PASS THE TORCH

Jake, AK2I, reported the following VE Testing statistics during his animated presentation at last month's general meeting:

- Examinations have been offered continuously for 34 months.
- There have been 373 examinees.
- A total of 507 elements have been administered.
- Highest attendance - 20 - January 1986.

• Lowest attendance - 5 - January 1987

Jake will be driving to Chicago on January 30th, for a 6 to 9 month assignment at the Sears Tower, and is expecting to be on the air, on 20 and 75, around February 3rd. Have a safe trip, Jake. We'll be anxiously awaiting your return.

Meanwhile, the torch has been passed to Ramona, KM3N, who is the new chairperson of the VE Program committee.

We wish Ramona good luck, and continued success, with this popular, and worthwhile, public service, which Jake was so instrumental in starting!

CORRECTION - In the Phil-Mont Award list in our last issue, The Leroy Hauser Award for 1968 should read WA3CNI, our Intrepid Carfoolist.

MINUTES November 1987 GENERAL MEETING

KA3BET opened the meeting at 8:00 PM on November 2, 1987 at the Franklin Institute.

KB3IV gave the treasurer's report which was approved as read.

W3888 informed those present that the Collins KMM380, that was entrusted to the club for sale, was sold to KB3JW.

N3DHI announced that the SET drill was very successful, and took the opportunity to thank those who participated in the drill. He then turned the control over to the volunteer operators.

KA3BET reminded all of our shut-in members. Please keep them in mind.

W3VVS reported that there were 25 members and 5 guests present. He then introduced

William Popovich, N3FVI; Bradley, N3FAV; Paul Truax; Sal Valenti; and William Coleman, KA3RKZ. AK2I announced that there were 11 examinees this evening. One walked in a Novice and left an Advanced Class with a certificate for 20 WPM code.

KA3BET introduced Ramona, KM3N, to those present, as our new VE Coordinator as of January 1988. This is in response to someone in Chicago making Jake, AK2I, an offer he couldn't refuse. KA3BET turned the helm over to W83CMM to introduce to-night's program.

The meeting was adjourned at 9:47 PM

Respectfully Submitted,
N3EAY, Secretary.

MINUTES November 1987 DIRECTORS' MEETING

KA3BET opened the meeting at 8:00 PM on November 18, 1987 at the home of AK2I. Those in attendance were: W83CMM, W3GQD, KB3IV, W3IIM, W3DSG, K3KUD, W3RM, W3888, W2GMA, W3AA, W3ZPP, AK2I, KC2HX and KA3BET.

KB3IV ON THE MONEY: gave the treasurer's report which was approved as read.

W3888 stated that the saddle stapler has been ordered for the Blurb.

W3888 brought to the attention of the directors, that the next step in the proposed repeater improvements was to acquire a digital voice recorder. He also advised the directors that the identical radio to our repeater was available for the 450 MHz band and suggested that we acquire this to complete our 450 link. This will also include the capability of a remote phone

patch. The patch will be located at W3RM's and will require a simple phone patch controller. After some lengthy discussion, the directors decided to:

1. Purchase the 450 MHz TAC-200 radio;
2. Link the 450 MHz with 2 Meters;
3. Install the remote phone patch; and
4. Maximize the features of the new controller.

KA3RLD was voted into membership this evening. Congratulations!

Due to the upcoming construction at the Franklin Institute, possible other meeting locations are being looked into.

The meeting was adjourned at 9:37 PM.

Respectfully Submitted,
N3EAY, Secretary.

MICRONESIAN VISITORS AA6EA

In previous years, visitors traveled to Micronesia in Spanish galleons, New England whaling vessels, pirate ships and Japanese submarines. Today, visitors arrive on modern jets and cruise ships. Yet, although the modes of transportation have changed, the reasons for going have remained very much the same -- Micronesia with its tropical sun and sparkling ocean has always been an ideal area to find a haven to relax, renew and refresh.

The 2,000 islands and atolls of the Pacific which comprise Micronesia were first encountered by the Western World in 1521 during Ferdinand Magellan's historic around-the-world voyage. Later on, Guam became an important stop-over for the Manila galleons, while during the mid-nineteenth century, Pohnpei and Kosrae became favorite winter retreats for American whalers. A few decades later, Palau, Yap and the Marshalls were profitable locations for Germans to trade for dried coconut and sea cucumber.

Despite all of this international contact throughout the centuries, Micronesia has remained obscurely known, especially when compared to its romanticized neighboring island group, Polynesia. But slowly, ever slowly, visitors are realizing that the many varied islands of Micronesia are a perfect place to vacation.

These modern day "South Sea" travelers no longer bring with them whaling harpoons or calico cloth, but instead, scuba gear, cameras, and for the privileged few, their amateur radios to enjoy the ultimate of a tropical DX-pedition.

For those holding American licenses, transmitting from the U.S. territory of Guam, (KH2) of the United States' Commonwealth of the Northern Marianas, (KH0), is no problem. Guam with its bases is a particularly popular QTH for hams, especially those whose military assignment have

taken them, less willingly than other Micronesian visitors, far from what they call home.

The rest of Micronesia, until a few years ago, was included with the Northern Marianas in the Trust Territory of the Pacific Islands. Now these other islands are in transition into three separate countries, The Republic of Palau, (KC6), the Federated States of Micronesia, consisting of Yap, Truk, Pohnpei and Kosrae, (also KC6), and The Republic of the Marshalls, (KX6). These new nations are still in a semi-independent state with the United States and right now, some entities consider them U.S. while to others, they are foreign. For hams wishing to keep up their transmission time while visiting any of these islands, it is best to check with both parties first to see what the current status is.

But Micronesia is too large and diverse to fully discuss all at once. It spreads over an area of ocean approximately equal to that of the Continental United States. It includes a native population speaking over a half dozen distinct languages and doing things according to their own particular customs. This short introduction to the forgotten islands of the Pacific will be followed by a series of reports on Micronesia from an amateur radio operator's point of view. So, until then, just tie the antenna to a coconut palm and enjoy the sunset as the waves crash on the shore.

Yokwe, Len Mwo, Kaselhelua, Ran Annia, Hafa Adai... and of course, 73s.

All 1988 meetings, held at the Franklin Institute, will be located in the 5th floor classroom.

December 27, 1987

Woody Haldeman, W3PST
125 Keeley Ave.
New Britain, PA 18901

Dear Woody:

Enclosed you will find the first of the series of articles on Micronesia and amateur radio. I am glad that you will be able to use this material for your newsletter. This introduction will be followed by 8 or so close-up discussions of the specific islands or island groups. I will send them to you as we pass through Micronesia, so the schedule of regularity will depend somewhat upon how long we stay at each place, so they will probably be spaced out sufficiently for your needs.

I am very happy to provide this information to as many fellow hams as possible. I would appreciate it if you could please return the copies of the articles that I send and any of the issues of your newsletters in which these appear to have in my records.

73,

Nancy Vander Velde, AA6EA
940 Arbolado Rd.
Santa Barbara, CA 93103

WHAT ARE VOLUNTEERS?

Volunteers are like Ford.....	They have better ideas.
Volunteers are like Coke.....	They are the real thing.
Volunteers are like Pan Am.....	They make the going great.
Volunteers are like Pepsi.....	They have a lot to give.
Volunteers are like Dial Soap.....	They care more; don't you wish everyone did?
Volunteers are like VO-5 hairspray...	Their goodness holds in all kinds of weather.
Volunteers are like Hallmark Cards...	They care enough to give the very best.

But Most Of All,
Volunteers Are Like Frosted Flakes... THEY'RE GREAT!

from W3ZPP's January 1988 issue of Retirement Life.

MINUTES December 1987 GENERAL MEETING

KA3BET opened the meeting at 8:00 PM on December 7, 1987 at the Franklin Institute.

KB3IV gave the treasurer's report which was approved as read.

W3VVS reported that there were 32 members and 7 guests present. He then introduced Mim Roeshman; Dick Dabagian, KA3EMN; Sal Valente, N3FVW; Ed Zavorski; Stella Tinaglia; Greg Malone, N3FSC; and John Clifton, KA3RRG.

KA3BET introduced N3DHI who presented Phil-Mont's awards for 1987 on behalf of the Awards Committee. After the awards were distributed, Rick took the opportunity to thank the Awards Committee for their diligent efforts, and W3888 for his delivery service.

W3888, still alive and in good health, (but getting a bit hairy -Ed) announced that a phone patch...yes, a phone patch...is in the works. It will have to overcome a few technical difficulties, but the future will probably hold a lot of touch toning.

N3DHI took the floor again to announce that, thanks to W3IIN, W3888, N3EAY, (and N3DHI), we now have new carpeting throughout MO-COM...that's wall to wall to gear shift to wheel well. That concludes the scheduled work on the van, and leaves it at the ready for service as needed.

N3DHI, spying AK2I enter from his duties as Chief V.E., command-

ed the attention of those present as he presented Jake with an award for his unyielding efforts towards the club in general, and especially for his work with the V.E. Program.

AK2I, never to miss an opportunity, maintained the crowd's attention as he presented his V.E. synopsis for the evening. Jake reported that there were 15 examinees this evening, and the passing rate was 85%!

KA3BET turned the floor over to our Judge of Elections this evening, W3888. The election then took place in accordance with the By-Laws of The Phil-Mont Mobile Radio Club. The results were:

President :	N3EAY
Vice-President:	W3CMM
Secretary:	N2RM
Treasurer:	KB3IV
Director:	KB3JW
Director:	K3KUD

W3888 took this time to thank all those present for voting and to thank his trustworthy staff for helping to count the vote.

KA3BET then entertained a motion from the floor to adjourn the meeting. The motion carried and the meeting was adjourned at 10:05 PM

Respectfully Submitted,
N3EAY, Secretary.

MINUTES December 1987 DIRECTORS' MEETING

KA3BET opened the meeting at 8:00 PM on December 16, 1987 at the home of W3ZPP. Those in attendance were KA3BET, KB3IV, K3GNM, W3888, W3AA, W3ZPP, N3DHI and N3EAY.

KB3IV ON THE MONEY gave the treasurer's report which was approved as read.

Two membership applications came before the directors this evening: John Clifton, KA3RIG, and Ted Meyers, N3FTZ. W3888 made the motion to accept both members. N3EAY seconded the motion. The vote was unanimous in favor of the applicants.

Continued on page 14

HAM OPERATOR IN 2 STATES HAVE HIGH RATES OF FATAL CANCERS

from The Philadelphia Inquirer,
Jan. 3, 1988

TACOMA, Wash. - Amateur radio operators in two states appear to have died at abnormally high rates from several forms of cancer, suggesting a possible link between cancer and electromagnetic fields, according to data collected by a state epidemiologist.

Others cautioned that evidence of such a link has been inconsistent and that other factors may be involved.

Dr. Samuel Milham, Jr., of the Washington Department of Social and Health Services, studied the deaths of 2,485 Washington and California ham operators between 1979 and 1984.

He reported in the American Journal of Epidemiology that 29 leukemia deaths would be expected in a group of people that size, but he found 36 deaths. Statistically, he expected to find 72 lymphatic cancers and cancers in blood-forming organs, but found 89. And he expected to find 67.6 deaths from prostate cancer, but found 78.

The study "indicates that amateur radio operator licensees in Washington state and California have significant excess mortality due to acute myeloid leukemia, multiple myeloma and perhaps certain types of malignant lymphoma," Milham reported. All those diseases are forms of cancer.

He said last week that even more disturbing studies have come from other scientists. University of Colorado and University of North Carolina studies, for example, have found unusually high levels of leukemia among children who live near power lines, he said.

Dr. Noreen Harris, a Tacoma-Pierce County Health Department epidemiologist, said many questions remain on the issue. "People living near power lines may be poor, and other (cancer causing) things may be in their environment," she said.

Leonard Sagan, program manager for radiation studies at the Electric Power Research Institute in Palo Alto, Calif., warned that studies like Milham's can be misinterpreted. Milham's finding could be simple associations that have nothing to do with cancer causes among people who work with electricity, he said.

Sagan said his own research has not shown whether electricity causes cancer. But he said that if it did, it would be rare. "I think it would be unfortunate for people with children to become overly concerned about this," he said. "Evidence is weak and inconsistent, and in a few years we will have better evidence."

FOR SALE

DENTRON GLA1000 linear with input and 10m mods..... \$225.00

SWAN SW240 HF transceiver 20/40/80m..... 195.00

KENWOOD TS820 with VFO, 1.8kHz SSB filter, 800 cycle CW filter, switchable on front panel, recent finals..... 650.00

HEATH 75m SSB transceiver.. 35.00

48ft steel tower with new 3ft angle iron sections, welded on to base; rust proofed, three coats Rustoleum. Rotor already installed. On Ground, ready to go..... 225.00

40ft wooden tower, fine for supporting wire antennas..... Free

Several hundred feet of radio wire.... Free with tower or beam.

7 drawer metal desk, 5ft width, includes top shelving for ham radio use..... 65.00

40 years' accumulation of junk boxes at amazing prices.

SNOWBIRDS W3SGR

On ten meters the net started at 10 AM on 28400. Sam, GBA was the northern net control and I, SGR was the southern net control.

We, down south (HI), couldn't hear fellows up north. Them who were up north couldn't hear us Southerners (HI). This is the reason for two net controls.

Now for the Snowbirds. The Snowbirds got on the air at 9 AM on 14237. UQ and PXW forgot to set their alarm clocks, so they were not on freq.

QRM!!--Boy! I had Tarpon Springs and some guy in Ohio yelling at me, "This frequency is taken."

Nuts! The whole airway was taken, so we popped on to 14237.3, nicely between the two. They were our Alligators. The PBT worked very well. We had 10 stations on the freq. They were 2RN/4, FUM, 4CN, AA, southern control, ANC, PXV, HSA, WM and Fred up in New England WISSI, were the Northerners.

It was very good. I enjoyed it, hope you did. Come on Down!!

Hey! I was there also.

CORDLESS PHONE INTERFACE

lifted from the BRATS'
MILLIWATT

Wouldn't it be fun to remotely operate your HF transceiver, that's in your ham shack, from your living room as you relax, watching the evening news? Or how about remotely operating your HF rig while mowing the grass, raking leaves or shoveling snow?

MFJ's new cordless phone interface lets you use your cordless phone to remotely operate your rig!

For remote operation, you simply plug the base unit of your cordless phone, and the microphone and speaker of your transceiver, into the MFJ-630 cordless phone interface. Then, with your cordless phone, you can operate your rig using VOX anywhere within range of your phone's base unit.

List price is \$39.95. For more info, contact MFJ Enterprises at 1-800-647-1800.

We will print an ongoing schedule of Hamfests based on information received. Please help us keep our list current. If you don't see your favorite event listed here, it's because YOU didn't send it to W3IIM prior to the BLURB deadline!

The recent story about people's contact lenses being bonded to their corneas (which then came out with the lenses - ugh!) by sparking equipment is not true. As we suspected from the start, it's one of those modern folktales (remember the spiders in the beehive hairdo?). Eye protection is important, but let's put this scare story in file 13.
